This report studies the global Cellular Concrete market status and forecast, categorizes the global Cellular Concrete market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Cellular concrete is a lightweight construction material made of Portland cement, water, foaming agent, and compressed air. It is also known by other names, such as, aerated concrete, air-cured lightweight concrete, Autoclaved Cellular Concrete (AAC), and cellular light weight concrete.

Cellular concrete is economical and provides high fluidity, high strength, fire resistivity, mold resistance, and increased durability. These specific properties enable it to provide superior performance and more cost-efficient construction than conventional materials. The cellular concrete market has been segmented based on application and end-user industry. In 2016, based on application, building blocks, slabs, and arches accounted for the largest share. Cellular concrete is also widely used in the insulation of pipelines, construction of roads, bridges, tunnels, and others. Besides, it is ideally suited for filling voids, owing to its low cost, high fluidity, and ability of volumetric expansion.

The global Cellular Concrete market is valued at 380 million US\$ in 2017 and will reach 570 million US\$ by the end of 2025, growing at a CAGR of 5.1% during 2018-2025.
