## Abstracts

This report studies the global Cenospheres market status and forecast, categorizes the global Cenospheres market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A cenosphere is a lightweight, inert, hollow sphere made largely of silica and alumina and filled with air or inert gas, typically produced as a byproduct of coal combustion at thermal power plants. The color of cenospheres varies from grey (or gray) to almost white, with a typical size between 5 and 500 microns.

Cenospheres industry has low technology barrier and is labor intensive industry.

Currently, there are many producing companies in the world cenospheres industry. The main market players are Zhengzhou Hollowlite Materials, Shijiazhuang Horse Building Materials, Shanghai Yisong, CenoStar, Ceno Technologies and Cenosphere India Pvt. The sales of cenospheres increase to 205629 MT in 2016 from 163982 MT in 2011 with average growth rate of 4.63%.

The particle size of cenospheres mainly concentrated in 30-40 Mesh. And each particle range has different price and application industries relatively. With properties of low density and thermal insulation of cenospheres, the downstream application industries will need more cenospheres products. So, cenospheres has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high purity and good performance cenospheres through improving technology.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition.

The global Cenospheres market is valued at 170 million US\$ in 2017 and will reach 280

million US\$ by the end of 2025, growing at a CAGR of 6.9% during 2018-2025.
