## Abstracts

This report studies the global Ceramic Coatings market status and forecast, categorizes the global Ceramic Coatings market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Ceramic coatings are being extensively used in the automobile and transportation industry owing to its anti-corrosion properties and offering resistance to abrasion and heat. Ceramic coatings are also used for providing a finished polish look on the exterior body of cars slowly replacing wax.

With growing research and development activities, ceramic coatings are venturing into wider application segments. Currently, automobile and transportation are expected to be the largest application for ceramic coatings. However, with further product innovations, the ceramic coating is likely to have larger application share than its counterparts such as PTFE or regular coatings.

The global Ceramic Coatings market is valued at 8210 million US\$ in 2017 and will reach 14000 million US\$ by the end of 2025, growing at a CAGR of 6.9% during 2018-2025.
