## Abstracts

This report studies the global CFRTP market status and forecast, categorizes the global CFRTP market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Thermoplastic composites or CFRTP are generally based on resins that are made of polycarbonate and are the growing substitute of metal and different solutions of plastic composites. Various types of continuous fiber reinforced thermoplastic composites or CFRTP are being designed and developed by leading companies with features such as lightweight and thin in size that will help in advancing the solutions for the automotive, consumer goods, transportation, and IT markets. They can be flame-retardant materials as well with impeccable power and dimensional stability. These fiber reinforced thermoplastics are also formable freely, recyclable, and can be processed easily as well. Further these novel materials also present excellent surfaces, thus enabling all kinds of paintings and coatings.

North America accounted for the largest share of the CFRTP market in 2017, owing to the high demand for CFRTP from aerospace, automotive, and consumer durables sectors. In addition, mass production of CFRTP and increasing usage of composites in aerospace application are other significant factors contributing to the growth of the CFRTP market in the North American region. North America is also expected to be the fastest-growing market for CFRTP in the next five years.

The CFRTP market is driven by the increasing demand for fuel-efficient vehicles, increasing use of CFRTP in aerospace applications, and flexibility offered by CFRTP in manufacturing complex shapes & designs. In addition, technological advancements for the mass production of CFRTP are further propelling the growth of the CFRTP market.

The global CFRTP market is valued at 1690 million US\$ in 2017 and will reach 3230 million US\$ by the end of 2025, growing at a CAGR of 8.5% during 2018-2025.
