Abstracts

Cholesterol is a kind of sterol or steroid, of which the chemical formula is $C_{27}H_{46}O$. Cholesterol is a kind of flaky crystal under solid state, white and odorless. At present, cholesterol is mainly produced with lanolin and is industrially applied as raw materials of Vitamin D3, additive to prawn feed, medicine, as well cosmetics emulsifier and etc. Cholesterol is used in pharmaceutical, cosmetic and crustacean feed applications.

According to QYResearch's new survey, global Cholesterol Powder market is projected to reach US\$ 368.5 million in 2029, increasing from US\$ 261.7 million in 2022, with the CAGR of 5.0% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Cholesterol Powder market research.

The Cholesterol API market is primarily driven by the increasing prevalence of cardiovascular diseases and the demand for cholesterol-lowering medications. Cholesterol active pharmaceutical ingredients (APIs) play a critical role in formulating drugs that help manage cholesterol levels and reduce the risk of heart-related conditions. The growing awareness of heart health, coupled with the rising incidence of obesity and sedentary lifestyles, contributes to market growth. Moreover, advancements in drug development, including novel therapies and combination drugs, further propel adoption. However, challenges include managing potential side effects and ensuring adherence to treatment regimens. Navigating the evolving regulatory landscape, optimizing drug formulation, and addressing affordability concerns for a broader patient population are ongoing concerns. The market's success relies on continuous research to improve API efficacy and safety profiles, collaborations between pharmaceutical manufacturers and healthcare professionals, and comprehensive patient education on

cholesterol management while addressing the evolving challenges associated with cardiovascular disease prevention and cholesterol-lowering therapy.
