## Abstracts

Owing to these developments there is rise in demand for circular products that are recyclable and have minimal negative impact of environment. Additionally, circular polymers are recyclable and regenerative in nature which promotes transition to circular economy thus creating high demand in market.

According to QYResearch's new survey, global Circular Polymer market is projected to reach US\$ 969.5 million in 2029, increasing from US\$ 633 million in 2022, with the CAGR of 6.3% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Circular Polymer market research.

Chemical is an important driver of this industry. Emerging economies, particularly in Asia and Latin America, are experiencing rapid industrialization, urbanization, and population growth. This drives the demand for bulk chemicals across various sectors, including construction, automotive, electronics, agriculture, and consumer goods. The rising middle class in these regions is also contributing to increased consumption of chemical products.
