This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Commercial Aircraft Batteries are used to start engines while initiating taxiing and auxiliary power units (APUs) for a variety of functions, such as acting as a buffer in regulating DC network voltage, and ensuring acceptable power quality for the equipment connected to it. In case of in-flight general electrical failure, the aircraft depends on batteries to power the essential loads until landing and evacuation.

Due to fluctuation of global economics in recent years, Commercial Aircraft Battery market developed in a slow speed. At present, Europe and USA are still the main market of Commercial Aircraft Battery. With the developing of commercial aircraft industry, developing countries will become important in the market, such as China and Brazil etc. Viewed from the supply side, there are a few manufacturers in the Commercial Aircraft Battery industry, while from the demand side; the current demand for Commercial Aircraft Battery is growing.

At present, there are a few manufacturers in the world and the market concentration is high. The top5 revenue companies are Concorde Battery, Cella Energy, Saft, Gill Battery and EaglePitcher. The five companies occupy about 75.06% of the market share.

To grab more market, the little companies have to expand the technology, capital investment and brand influence. To meet the challenge of the little companies and keep their leading stage, leading companies need to increase the technology innovation and speed up the product upgrading. Due to the stable supplying chain, Commercial Aircraft Battery market will still be a market leading by a few companies in future.

The global Commercial Aircraft Battery market is valued at 130 million US\$ in 2017 and will reach 160 million US\$ by the end of 2025, growing at a CAGR of 2.2% during 2018-2025.
