1 Commercial Chicken Feed Market Overview

1.1 Product Overview and Scope of Commercial Chicken Feed

Poultry feed is food for farm poultry, including chickens, ducks, geese and other domestic birds.

Feed ingredients for poultry diets are selected for the nutrients they can provide, the absence of anti-nutritional or toxic factors, their palatability or effect on voluntary feed intake, and their cost. The key nutrients that need to be supplied by the dietary ingredients are amino acids contained in proteins, vitamins and minerals. All life functions also require energy, obtained from starches, lipids and proteins.
