Abstracts

Condom is a sheath-shaped barrier device that may be used during sexual intercourse to reduce the probability of pregnancy and spreading sexually transmitted infections (STIs/STDs) such as HIV/AIDS. It is rolled onto an erect penis before intercourse and blocks ejaculated semen from entering the body of a sexual partner. Condoms are also used during fellatio and for collection of semen for use in infertility treatment. In the modern age, condoms are most often made from latex, but some are made from other materials such as polyurethane, polyisoprene, or lamb intestine.

The Global production of the Condoms is about 32674 Million Pcs in 2015. The production region is relative concentrated. Currently, the largest production region is Asia. The durex brand occupies the largest markets share.

The main consumption regions are relative dispersion. The Condom's consumption has great relationship with the local economical developed level and population. Currently, the largest consumption region is China, China occupies about 1/3 market share.

The price has been rising continuously; the average price is about 118 USD Per K Pcs in 2015. The gross margin has the different trend with the price.

The import volume is very large; the consumption volume of USA mainly depends on import. Currently, the Condoms have a certain degree of anti-dumping phenomenon. Most of the factories are moving to Asia.

In the future, the Condoms will have a good future; the price fluctuation has relationship with the raw material and brand effect. The technology will more mature and the monopoly phenomenon will be weaken.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
