## Abstracts

This report studies the global Cone Crusher market status and forecast, categorizes the global Cone Crusher market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A cone crusher is similar in operation to a gyratory crusher, with less steepness in the crushing chamber and more of a parallel zone between crushing zones. A cone crusher breaks rock by squeezing the rock between an eccentrically gyrating spindle, which is covered by a wear-resistant mantle, and the enclosing concave hopper, covered by a manganese concave or a bowl liner. As rock enters the top of the cone crusher, it becomes wedged and squeezed between the mantle and the bowl liner or concave. Large pieces of ore are broken once, and then fall to a lower position (because they are now smaller) where they are broken again. This process continues until the pieces are small enough to fall through the narrow opening at the bottom of the crusher.

In the coming years there is an increasing demand for cone crusher in the regions of Asia-Pacific and South America that is expected to drive the market for more advanced cone crusher. Increasing of construction industry fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on machinery manufacturing industry, retrofitting and renovation of old technology, increasing adoption of cone crusher will drive growth in global market.

Globally, the cone crusher industry market is low concentrated as the manufacturing technology of cone crusher is relatively matures than some high-tech equipment. And some enterprises, like Metso, Sandvik, Terex and Astec Industries, etc. are well-known for the wonderful performance of their cone crusher and related services. At the same time, Asia-Pacific, occupied 35.87% production market share in 2015, is remarkable in the global cone crusher industry.

The consumption volume of cone crusher is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of cone crusher industry may not keep that fast. But it is surely forecasted that the market of cone crusher is still promising.

The global Cone Crusher market is valued at 910 million US\$ in 2017 and will reach 1120 million US\$ by the end of 2025, growing at a CAGR of 3.0% during 2018-2025.
