Abstracts

Floriculture is a branch of horticulture addressing flower and ornamental plant cultivation and propagation of flowering plants for gardens, greenhouses, nurseries and landscapes comprising the floral industry. Floriculture crops include bedding plants, houseplants, flowering gardens and potted plants, cut cultivated greens, and cut flowers.

As for consumption, Europe is also the largest consumer of consumer floriculture, with 53.24% consumption share. North America and China are also key consumers. In addition, on the consumption side of the business, the rise of online consumer floriculture sales is definitely one of these trends.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Consumer Floriculture 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Consumer Floriculture 3900 industry.
