Cork stopper is a stopper made of cork. Cork is an impermeable buoyant material, a prime-subset of bark tissue that is harvested for commercial use primarily from *Quercus suber* (the Cork Oak), which is endemic to southwest Europe and northwest Africa. Cork is composed of suberin, a hydrophobic substance and, because of its impermeable, buoyant, elastic, and fire retardant properties, it is used in a variety of products, the most common of which is wine stoppers. The montado landscape of Portugal produces approximately half of cork harvested annually worldwide, with Corticeira Amorim being the leading company in the industry. Cork was examined microscopically by Robert Hooke, which led to his discovery and naming of the cell, especially a bottle stopper. Corked stopper industry has an intense competition in recent years. American consumers prefer wine with cork stoppers. In the past five years, the survey found that top 100 wine companies using cork stoppers lead the growth of the wine market.
