Coupling is a device used to connect two shafts together at their ends for the purpose of transmitting power. Couplings do not normally allow disconnection of shafts during operation, however there are torque limiting couplings which can slip or disconnect when some torque limit is exceeded.

The Coupling is Very fragmented, the production of top sixteen manufacturers only account about 10% of global production. The high-end products mainly come from Europe and North America.

In the world wide, the plants of major manufactures mainly distribute in North America and China. The transnational companies, like Siemens and SKF, are the leading manufactures in the World.

The import and export business of this industry is not very frequent. The main reason lies in that the coupling manufactures build factories in the main consumption countries.

The global Couplings market is valued at 24800 million US\$ in 2017 and will reach 25700 million US\$ by the end of 2025, growing at a CAGR of 0.4% during 2018-2025.
