Abstracts

This report studies the global CPU Cooler market status and forecast, categorizes the global CPU Cooler market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

CPU Cooler is required to remove the waste heat produced by CPU, to keep CPU within permissible operating temperature limits.

Computer Components are often designed to generate as little heat as possible, and computers and operating systems may be designed to reduce power consumption and consequent heating according to workload, but more heat may still be produced than can be removed without attention to cooling. Use of heatsinks cooled by airflow reduces the temperature rise produced by a given amount of heat. Attention to patterns of airflow can prevent the development of hotspots. Computer fans are widely used along with heatsinks to reduce temperature by actively exhausting hot air. There are also more exotic cooling techniques, such as liquid cooling.

Antec, Inc., CORSAIR, Swiftech, NZXT captured the top four production value share spots in the CPU Cooler market in 2015. Antec, Inc. dominated with 20.37 percent PV share, followed by CORSAIR with 16.92 percent revenue share and Swiftech with 10.57 percent revenue share.

In the future, the USA production of CPU Cooler will show downward tendency further, production is expected in 2020 will be 7314 (K units).

Despite the presence of competition problems, due to the clear USA recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of CPU Cooler brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream

channels, the research group did not recommend taking risk the enter this market.

The global CPU Cooler market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
