Customized (OEM) Peristaltic Pump has a series of different flow range of peristaltic pump head, customer according to the requirements of their own equipment, design different peristaltic pump drive circuit. It works by pressure and displacement. It is used mainly to pump liquids through a tube, which is different than most other pumps in which parts of the pump actually come into direct contact with the liquid. It is one of the most common types of tools used to pump liquids, especially in medical settings.
