## Abstracts

This report studies the global Cylindrical Lithium Ion Battery market status and forecast, categorizes the global Cylindrical Lithium Ion Battery market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A lithium-ion battery or Li-ion battery is a type of rechargeable battery in which lithium ions move from the negative electrode to the positive electrode during discharge and back when charging. Li-ion batteries use an intercalated lithium compound as one electrode material, compared to the metallic lithium used in a non-rechargeable lithium battery. The electrolyte, which allows for ionic movement, and the two electrodes are the constituent components of a lithium-ion battery cell.

Cylindrical lithium ion battery industry is relatively concentrated, manufacturers are mostly in the Japan, Korea and China. Among them, Japan output value accounted for more than 36.33% of the total output value of global cylindrical lithium ion battery in 2016. Panasonic (Sanyo) is the world leading manufacturer in global cylindrical lithium ion battery market with the market share of 50.36%, in terms of revenue.

With the increasing in production capacity, expected that the cylindrical lithium ion battery raw material price will be stable in the short term. However, the improvement of energy, transportation costs, and labor costs, will play a significant role in promoting the cost of cylindrical lithium ion battery.

There are companies aims at the cost and quality leadership which shall improve profitability. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality.
