Abstracts

Damper Actuators is a device that controls the opening and closing of a damper in an HVAC or heating, ventilation and air conditioning system.

First, for industry structure analysis, the Damper Actuators industry is relatively concentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 60% of the revenue market in 2015. Regionally, USA is the biggest production area, also the leader in the whole Damper Actuators industry.

Second, the production of Damper Actuators increased from 11916 K Units in 2011 to 13871 K Units in 2015 with an average growth rate of more than 3.87%.

Third, Europe occupied 32.67% of the production market in 2015. It is followed by Chian and Japan, which respectively have around 11.33% and 8.33% of the global total industry. Geographically, USA was the largest consumption market in the world, which took about 34.57% of the global consumption volume in 2015.

Fourth, for price trend analysis, a key variable in the performance of Damper Actuators producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global Damper Actuators revenue would keep increasing with annual growth rate with 3~5%. We tend to believe that this industry still has a bright future, considering the current demand of Damper Actuators.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Damper Actuators 4900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its

financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Damper Actuators 4900 industry.

Based on our recent survey, we have several different scenarios about the Damper Actuators 4900 YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ 1616 million in 2019. The market size of Damper Actuators 4900 will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.
