Denatured alcohol is ethanol (ethyl alcohol) made unfit for human consumption by adding one or more chemicals (denaturants) to it. Denaturing refers to removing a property from the alcohol (being able to drink it), not to chemically altering or decomposing it, so denatured alcohol contains ordinary ethyl alcohol.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Denatured Alcohol industry in larger demand on the market in the past few years, more and more companies enter into Denatured Alcohol industry, the current demand for Denatured Alcohol product is relatively low, lack of demand, excess supply. Ordinary Denatured Alcohol products on the market do not sell well; Denatured alcohol's price is lower than past years. The signal of market price change indicates the trend in the Denatured Alcohol industry, low-end product has excess capacity but high-end product is in short supply.

There is a certain market space for denatured alcohol product, but basically showing the scarcity of high-end products, low-end products excess capacity, there is a large market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials.

As large demand of high-end products at home and abroad, growing number of enterprises enter the business of denatured alcohol production. But the gross margin of denatured alcohol production is relatively low because of the industry features.

The global Denatured Alcohol market is valued at 69900 million US\$ in 2017 and will reach 117200 million US\$ by the end of 2025, growing at a CAGR of 6.7% during 2018-2025.
