Abstracts

This report studies the global Denim Jeans market status and forecast, categorizes the global Denim Jeans market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Denim jeans are trousers typically made from denim fabric. They are now a very popular article of casual dress around the world. They come in many styles and colors. However, denim blue jeans are particularly identified with US culture, especially the United States Old West. As well, although denim jeans are mostly known as a fashion garment in the 2010s, they are still worn as protective garments by some individuals, such as cattle ranch workers and motorcycle riders, due to their high durability as compared to other common fabrics.

Since the post war era, the denim jeans became popular among young people. Denim jeans are a cornerstone of the American wardrobe and an important cotton product (accounting for almost one-fifth of all cotton clothing at retail). Almost all U.S. consumers own denim jeans and most of them say their closets are full of denim and they enjoy wearing it regularly.

Denim jeans are purchased for durability, longevity, and versatility because consumers find greater value in a product they know will last longer and fit better; therefore price is not the main factor in the denim jeans purchase decision, unlike other clothing. This positioning ensures that denim jeans will continue to have a place on store shelves and in consumers' closets. And the brands that consumers' favorite are Levi's, Lee, Wrangler, Gap Inc., Old Navy, and so on.

The global Denim Jeans market is valued at 57400 million US\$ in 2017 and will reach 60600 million US\$ by the end of 2025, growing at a CAGR of 0.7% during 2018-2025. The major players covered in this report
