Abstracts

This report studies the global Die Casting Machine market status and forecast, categorizes the global Die Casting Machine market size (value & volume) by key players, type, application, and region. This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Die casting is a manufacturing process for producing accurately dimensioned, sharply defined, smooth or textured-surface metal parts. It is accomplished by forcing molten metal under high pressure into reusable metal dies. The process is often described as the shortest distance between raw material and finished product.

For industry structure analysis, the Die Casting Machine industry is not that concentrated. The top five producers account for about 48.89% of the revenue market. Regionally, China is the biggest consumption area of Die Casting Machine.

China occupied 41.28% of the consumption market in 2016. It is followed by Europe, which respectively have around 15.05% of the global total industry.

For price trend analysis, a key variable in the performance of Die Casting Machine producers is raw material costs, specifically the speed at which any increase can be passed through to customers. The price of the major raw material varies according to the steel price. This year, as the downturn of global steel industry, the Die Casting Machine price would keep decreasing for at least the following 5 years.

For forecast, the global Die Casting Machine revenue would keep increasing with annual growth rate with 6~7%, and a little higher speed in China. We tend to believe that this industry still has a bright future, considering the current demand of Die Casting Machine. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

The global Die Casting Machine market is valued at 1910 million US\$ in 2017 and will reach 3230 million US\$ by the end of 2025, growing at a CAGR of 6.8% during

2018-2025.
