Abstracts

Digital content industry is an important component of the digital economy. The so-called digital content industry is the use of digital high-tech tools and information technology to integrate the image, text, images, audio and other content into products and services. Digital content is stored on either digital or analog storage in specific formats. Forms of digital content include information that is digitally broadcast, streamed, or contained in computer files. Viewed narrowly, types of digital content include popular media types, while a broader approach considers any type of digital information (e. g. digitally updated weather forecasts, GPS maps, and so on) as digital content. Digital content has seen an increase as more households now have access to the Internet. Therefore, it is easier for people to receive their news and watch TV online, rather than from traditional platforms. Because of this increased access to the Internet, digital content is commonly published through individuals in the form of eBooks, blog posts, and even Facebook posts.

The major producers in this industry include Tencent, Microsoft, Sony, etc., whose annual revenue accounts for 4.16%, 4.08% and 3.99% respectively. By region, North America had the highest share of income in 2019, at 34.41 percent.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Digital Content market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events

restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Digital Content industry.

Based on our recent survey, we have several different scenarios about the Digital Content YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ 152120 million in 2019.
