## Abstracts

This report studies the global Dimethylolpropionic Acid (DMPA) market status and forecast, categorizes the global Dimethylolpropionic Acid (DMPA) market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Dimethylolpropionic acid is a free flowing white crystalline solid consisting of one tertiary carboxylic group and two hydroxyl groups. The carboxylic acid group is less reactive and hence, DMPA act as a diol. The free acid group promotes resin water solubility, eases the introduction of a polar group in order to improve coating adhesion and synthetic fibre dye receptivity.

Substantial growth in production of polyurethane dispersion primarily in APAC, growing penetration of powder coating in automobile industry and growing investments in polyester resin market are some of the drivers of global DMPA market.

The global Dimethylolpropionic Acid (DMPA) market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
