Abstracts

Most of the time, genetic testing is done through healthcare providers such as physicians, nurse practitioners, and genetic counselors. Healthcare providers determine which test is needed, order the test from a laboratory, collect and send the DNA sample, interpret the test results, and share the results with the patient. Often, a health insurance company covers part or all of the cost of testing.

According to QYResearch's new survey, global Direct Genetic Testing for Consumer market is projected to reach US\$ 5076.3 million in 2029, increasing from US\$ 1569 million in 2022, with the CAGR of 18.3% during the period of 2023 to 2029.
