An electric gripper is a tool mounted on the equipment to grip work pieces. By opening and closing the fingers powered by electric motor rather than pneumatic power, the electric gripper grips and releases work pieces.

Electric gripper and pneumatic gripper are two different types of gripper both widely used in various automation applications. Compared with pneumatic gripper, electric gripper are more cleaner grippers, need no air lines and save on power and maintenance, and electric gripper is more suitable to be used for detect grip.

Compared with pneumatic gripper, electric gripper is relatively a new born product; but the market of electric gripper is growing with a quite considerable speed. There are two types of electric grippers which are commonly produced and used, which includes two-finger electric gripper and three-finger electric gripper. Electric gripper is environmentally friendly and much more silent at operating, and they are more suitable than pneumatic gripper in many application situation.

Worldwide, there are about thirty manufacturers of electric grippers; and there is growing number of enterprises are entering the market attracted by the market potential. SCHUNK, SMC, Destaco, IAI and Parker Hannifin are the top five manufacturers of electric gripper in the market currently; they account more than half of the market total production volume of electric gripper.

In the next five years, the global production of electric gripper is forecasted to maintain a 8%-11% annual growth rate, and the production volume is expected in 2022 will be 195 thousand units.

The global Electric Gripper market is valued at 160 million US\$ in 2017 and will reach 270 million US\$ by the end of 2025, growing at a CAGR of 6.3% during 2018-2025.
