Abstracts

This report studies the global Electronic Braking Systems (EBS) market status and forecast, categorizes the global Electronic Braking Systems (EBS) market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Electronic braking system (EBS) is an automobile brake technology that automatically varies the amount of force applied to each of a vehicle's brakes, based on road conditions, speed, loading, etc. Always coupled with anti-lock braking systems, EBS can apply more or less braking pressure to each wheel in order to maximize stopping power whilst maintaining vehicular control. Typically, the front end carries the most weight and EBS distributes less braking pressure to the rear brakes so the rear brakes do not lock up and cause a skid.

The global average price of electronic braking systems (EBS) is in the decreasing trend, from 606 USD/Unit in 2012 to 561 USD/Unit in 2016. With the situation of global economy, prices will be in decreasing trend in the following five years

The classification of electronic braking systems (EBS) includes disc EBS and drum EBS, and the proportion of drum EBS in 2016 is about 75%, and the proportion is in decreasing trend from 2012 to 2016.

Electronic braking systems (EBS) are widely used in truck, trailer and other field. The most proportion of electronic braking systems (EBS) is used in truck, and consumption proportion is about 58%.

Market competition is intense. Continental, Advics Group, WABCO, Knorr Bremse, Bosch, Haldex, MAN are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry.

The global Electronic Braking Systems (EBS) market is valued at 2660 million US\$ in 2017 and will reach 4150 million US\$ by the end of 2025, growing at a CAGR of 5.7% during 2018-2025.
