## Abstracts

This report studies the global Electronic IMU Sensors market status and forecast, categorizes the global Electronic IMU Sensors market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

An inertial measurement unit (IMU) sensor is an electronic device that measures and reports a craft's velocity, orientation, and gravitational forces, using a combination of accelerometers and gyroscopes, sometimes also magnetometers. In this report, the high performance IMU sensors were counted and analyzed. We take into account industrial, aerospace, defense applications (even industrial applications are considered as "high-performance" applications, as opposed to consumer ones). This refers to the applications: we take into account all the inertial sensors except the consumer / mobile and the automotive applications.

In the future, the global consumption of Electronic IMU Sensors will show upward tendency further, consumption is expected in 2020 will be 957.05 (K units). The average operating rate will remain at 89% to 92%.

Honeywell, Northrop Grumman, SAFRAN and Thales captured the top four revenue share spots in the Electronic IMU Sensors market in 2015. Honeywell dominated with 34.54 percent revenue share, followed by Northrop Grumman with 19.27 percent revenue share and SAFRAN with 9.25 percent revenue share.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Electronic IMU Sensors brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this

market.

The global Electronic IMU Sensors market is valued at 1690 million US\$ in 2017 and will reach 2290 million US\$ by the end of 2025, growing at a CAGR of 4.4% during 2018-2025.
