This report studies the global Electronic Refrigerant Leak Detector market status and forecast, categorizes the global Electronic Refrigerant Leak Detector market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Electronic Refrigerant Leak Detector has become a crucial tool for many trade professionals. Basically any equipment that is used in air conditioning or for cooling / freezing contains a refrigerant that has the potential to escape from the coils and joints, so leak testing occurs during production of the equipment, installation (if applicable) and periodic maintenance checks throughout the life of the equipment.

For industry structure analysis, the electronic refrigerant leak detectors industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 70% of the revenue market in 2016. Regionally, United States is the biggest production value area of electronic refrigerant leak detectors, also the leader in the whole industry.

The production of electronic refrigerant leak detectors increased from 1171.4 K Units in 2011 to 1363.1 K Units in 2015 with an average growth rate of more than 4.8%.

North America occupied 35% of the production market in 2016. It is followed by Europe and China, which respectively account for around 28% and 23% of the global total industry. Other countries have a small amount of production. Geographically, North America is also the largest consumption market in the world, which took about 29% of the global consumption volume in 2016.

The global Electronic Refrigerant Leak Detector market is valued at 80 million US\$ in 2017 and will reach 100 million US\$ by the end of 2025, growing at a CAGR of 3.4%

during 2018-2025.
