Abstracts

Electronic Stability Control (ESC) is highly effective in helping the driver maintain control of the car, thereby avoiding or reducing the severity of crashes. Electronic Stability Control (ESC) is a technology that improves the vehicle's stability by detecting and reducing loss of traction.

In the coming years, the increasing demand for luxury cars in the regions such as Europe and Asia-Pacific, mainly in China, India and Japan, is expected to drive the market. Sustainable growth in the electronic stability control system market will largely depend upon upcoming legislations in various countries. ESC systems are mandatory in developed countries, while legislations in developing countries are rapidly catching up creating high growth opportunities.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Electronic Stability Control (ESC) market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Electronic Stability Control (ESC) industry.
