The market is expected to have significant growth in the coming years owing to stringent environmental regulations across world to reduce the environmental pollution from spills.

Skimmers held the largest share of the market based on product type

Skimmers held the largest market size, in terms of product, primarily due to the increased demand for mechanical recovery methods for spill recovery. Unlike other methods, the mechanical recovery methods remove the spill material from the spill environment. Thus, skimmers are more effective in mitigating the environmental impact of the spills.
