Abstracts

Endoscope detergents and disinfectants are chemicals used for disinfection of various medical devices like endoscopes. Endoscopes are contaminated with high microbial load (bio burden) during each use. Detergents and disinfectants can kill almost all types of vegetative non-spore forming bacteria, fungi, viruses and mycobacteria (TB).

According to QYResearch's new survey, global Endoscope Disinfectants and Detergents market is projected to reach US\$ 10280 million in 2029, increasing from US\$ 5360 million in 2022, with the CAGR of 9.7% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Endoscope Disinfectants and Detergents market research.

According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry. The market is driven by several factors, including the increasing demand for advanced healthcare services globally, advancements in medical technology, growing geriatric population, rising healthcare expenditure, and increasing awareness about early disease diagnosis and treatment.
