## Abstracts

This report studies the global Enhanced Vision System (EVS) market status and forecast, categorizes the global Enhanced Vision System (EVS) market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Enhanced vision system, a stand-alone thermal imaging camera that sees infrared energy emitting, or radiating, from objects and forms a real-time video image that is displayed on an MFD or dedicated video display screen. The system's primary benefit is improving situational awareness. At night, an EVS eliminates the visual effects of darkness, turning it into day on the display, and enabling the pilot to see and avoid clouds at night. During the day, the system enables the pilot to see through smoke, haze and smog.

At present, in developed countries, the Enhanced Vision System (EVS) industry is generally at a more advanced level. The world's large enterprises are mainly concentrated in USA, Europe and Israel. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, and leading technical level.

By application, the global Enhanced Vision System (EVS) market is segmented into Military Aircraft, Business Jet and Other Civil Aircraft, The application market is saturated and the Business Jet have a quick development in recent years. According to the International Air Transport Association, China will surpass the United States to become the world's largest commercial air passenger market in the next two decades. Aircraft safety, situational awareness, and reliable operations at low visibility are factors driving the enhanced vision systems market. Whereas, high amount of investment and lengthy clearance process for upgradation of components act as some of the major restraints for the enhanced vision systems market.

The global Enhanced Vision System (EVS) market is valued at 210 million US\$ in 2017 and will reach 300 million US\$ by the end of 2025, growing at a CAGR of 5.3% during 2018-2025.
