Abstracts

Enzymes are very efficient catalysts for biochemical reactions. They speed up reactions by providing an alternative reaction pathway of lower activation energy.

After decades of development, the enzyme preparation industry in China has gained remarkable achievement. The capacity of enzyme preparation accounts quite important market share in the global enzyme preparation industry. But there is still quite a lot of weakness of the enzyme preparation industry in China. Such as limited product type, lack of high-end product, high production cost and etc.

Currently, there are more than one hundred manufacturers of enzyme preparation in China. There are not many huge enterprises, and the market is dispersed. The product homogeneity serious in China domestic enzyme preparation enterprises and the competition is fierce.

As the demand of enzyme preparation in China is increasing stable and fast, there are some international manufactures of enzyme preparation have open production bases in China. They are taking larger and larger market share because of their wonderful product quality.

Along with the development of Chinese domestic enzyme preparation industry, Chinese domestic enzyme preparation is getting mature, and growing number of enzyme preparation produced in China are exporting to other countries.

In summary, the enzyme preparation industry in China is still a sunrise industry. The capacity and production of enzyme preparation in China is forecasted to keep growing in the following decade.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Enzyme 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its
