Erosion control blankets are used to prevent surface erosion and accelerate the establishment of vegetation. Typically, blankets are intended for applications like slope protection, channel and ditch linings, reservoir embankments and spillways, culvert inlets and outfalls, levees and riverbanks, etc.

Erosion control blankets provide a mechanically stabilized form of immediate cover, functioning as a barrier against both the detachment and transportation phase of erosion process until vegetation or reinforced vegetation assume this function.

In the Global Erosion Control Blankets market, straw blanket is the main product in the market with lower price while Coir Blanket and Excelsior Blanket are occupying more and more market share. In addition, the blanket made from mix materials is also becoming more and more popular.

The global Erosion Control Blankets market is valued at 77 million US\$ in 2017 and will reach 120 million US\$ by the end of 2025, growing at a CAGR of 7.0% during 2018-2025.
