## Abstracts

This report studies the global ETFE Coatings market status and forecast, categorizes the global ETFE Coatings market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

This report studies the ETFE Coatings market, Ethylene tetrafluoroethylene (ETFE) is a fluorine-based plastic. It was designed to have high corrosion resistance and strength over a wide temperature range. ETFE is a polymer and its source-based name is poly(ethene-co-tetrafluoroethene). ETFE has a relatively high melting temperature, excellent chemical, electrical and high-energy radiation resistance properties. When burned, ETFE releases hydrofluoric acid.

ETFE coatings are mainly classified into two types: powder coating, fluid dipping coating. And powder coating is the most widely used type which takes up about 78% of the global total in 2016.

The global ETFE coatings average price is in the decline trend, from 23.2 \$/kg in 2012 to 20.7 \$/kg in 2016. The price will be in decline trend if more capacity goes into operation and price of the raw material get reduction in the future. The ETFE coatings sales will reach about 1954 MT in 2016 from 1533 in 2012 all around the world, with the CAGR of 2.9%.

USA is the largest consumption country of ETFE coatings in the world in the past few years and it will keep the same position in the next few years. USA market took up about 27% the global market in 2016, followed by Japan (25%), and Europe is followed with the share about 19%.

The global ETFE Coatings market is valued at 41 million US\$ in 2017 and will reach 46

million US\$ by the end of 2025, growing at a CAGR of 1.3% during 2018-2025.
