Evaporative Air Cooler for Home represent a low-cost, energy-efficient and an environmentally-friendly alternative to air conditioners. Air coolers are simple to use and cools air through the evaporation of water. Unlike conventional air conditioners, evaporative coolers require fresh air and work best with open windows and doors. Meanwhile, evaporative air cooler for home is an energy efficient, environmentally friendly product, and the use of air conditioners has contributed significantly to global warming and the destruction of the ozone layer.
