An excavator is a construction vehicle used to dig or move large objects. It is made up of two parts: a driving base and a powerful boom arm with an attachment designed for digging. The operator sits inside a small cab attached to the base and controls the arm.

The global excavators market is expected to grow in future due to increasing urbanization, rising construction expenditure, and improving economy. Key trends of this market include high demand in the fuel-efficient excavator, rapid technological advancements, use of IoT in construction, increasing demand from the rental market and rising adoption for other applications. However, there are some factors which can hinder the market growth including stringent emission norms and high maintenance of hydraulic excavators.

The global Excavator market is valued at 29500 million US\$ in 2017 and will reach 35000 million US\$ by the end of 2025, growing at a CAGR of 2.2% during 2018-2025.
