This report studies the global Fancy Yarn market status and forecast, categorizes the global Fancy Yarn market size (value & volume) by key players, type, application, and region. This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

A fancy yarn is a kind of yarn that differs from normal construction of single plain yarns by the way deliberately produced irregularities in its construction. These irregularities relate to an increased input of one or more of its components or to the inclusion of its periodic effects such as knots, slubs, curls or the like.

Fancy yarns are special products of spinning, twisting, wrapping, texturing and knitting, etc. The demand for yarns with structural and/or optical effects is due to the special aesthetic and high decorative appeal to the woven, knitted materials, and other textiles as well. Textile materials that are produced using yarns with effects find applications in normal and high fashion clothing.

Among the various fancy yarn, knop yarn accounts for the largest share. In 2016, about 166490 MT knob yarn was consumed globally. The follower is gimp yarn, which held 16.14% market share in the year.

The global Fancy Yarn market is valued at 3970 million US\$ in 2017 and will reach 6220 million US\$ by the end of 2025, growing at a CAGR of 5.8% during 2018-2025.
