Abstracts

This report studies the global Fax Machines market status and forecast, categorizes the global Fax Machines market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A facsimile (commonly referred to as a fax) is a production of an exact copy of a document by electronic scanning, and the subsequent transmission of the resulting data. Faxes are transmitted over ordinary phone lines using fax machines.

Panasonic, Canon, Brother and Philips captured the top four revenue share spots in the fax machine market in 2015. Panasonic dominated with 17.98% revenue share, followed by Canon with 12.99% revenue share, Brother with 11.49% revenue share and Philips with 9.99% revenue share.

In the United States and Europe, fax machines have pretty much disappeared. But in Japan, where they've long been an essential feature of homes as well as offices, faxes are still in widespread use. They were even deployed by authorities in 2011 to disseminate some information during the Fukushima nuclear disaster. Now the greatest fax use still occurs in Japan, especially among older people who grew up writing by hand, not typing on a keypad.

The global Fax Machines market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
