## Abstracts

Ferulic Acid is extracted from Rice Bran Oil. It is one of the most powerful natural anti-oxidants. Ferulic acid is a natural chemical that is found in the cell walls of plants. It is called phytochemicals, which are found in a wide variety of plant species. The official name for this product is 4-hydroxy-3-methoxycinnamic acid.

First, the ferulic acid industry concentration is relatively low and the industry scale is relatively small, there are more than 30 companies in the global market in 2014 and Delekang is the largest.

Second, many companies are with their own technology as this industry is not with high technology barrel. And all manufactures in the world are committed to the improvement of product. Such as manufacturers in China are actively in introducing global advanced technology and put lots of time and money in the improvement of their product performance.

Third, these six years, as the development of economic, this industry developed as well, and the application field had been widened. And in the coming years, the demand of ferulic acid will still raise in a rate around 4.36%.

Fourth, the import and export percent of this industry is relatively high. China, as the major region in the production, is a major export country. And the export volume in 2014 was about 58.13% of the production volume in China.

Fifth, this industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, as the major application field for ferulic acid is pharmaceutical industry, the need in the future will be uncertain.

Sixth, we tend to believe this industry now is close to mature, and the consumption increasing degree will show a smooth curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross

margin.
