## Abstracts

This report studies the global Flange Nut market status and forecast, categorizes the global Flange Nut market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A Flange nut is a nut that has a wide flange at one end that acts as an integrated, non-spinning washer. This serves to distribute the pressure of the nut over the part being secured, reducing the chance of damage to the part and making it less likely to loosen as a result of an uneven fastening surface.

These nuts are mostly hexagonal in shape and are made up of hardened steel and often coated with zinc.

The global Flange Nut market is valued at 770 million US\$ in 2017 and will reach 970 million US\$ by the end of 2025, growing at a CAGR of 3.2% during 2018-2025.
