This report studies the global Flat Panel Display market status and forecast, categorizes the global Flat Panel Display market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in United States, Europe, China, Japan, South Korea and Taiwan and other regions.

Flat-panel displays are electronic viewing technologies used to enable people to see content (still images, moving images, text, or other visual material) in a range of entertainment, consumer electronics, personal computer, and mobile devices, and many types of medical, transportation and industrial equipment. They are far lighter and thinner than traditional cathode ray tube (CRT) television sets and video displays and are usually less than 10 centimetres (3.9 in) thick. Flat-panel displays can be divided into two display device categories: volatile and static. Volatile displays require that pixels be periodically electronically refreshed to retain their state (e.g., liquid-crystal displays (LCD)).

In the application category, the Consumer Electronics segment is estimated to hold the largest share among the other segments by application by the end of 2025.

The global Flat Panel Display market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
