Abstracts

This report studies the global Flomoxef Sodium market status and forecast, categorizes the global Flomoxef Sodium market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Flomoxef sodium is an oxacephem antibiotic usually grouped with the cephalosporins. In oxacephems, the sulfur atom of the cephalosporin core is replaced with an oxygen atom.

Flomoxef sodium is a kind of APIs and useful for curing staphylococcus aureus infections. Due to high technology barrier, there are few companies able to produce the product and Shionogi highly monopolizes the market at the moment.

Although few companies have achieved commercial production of flomoxef sodium at this moment, they continue to invest on technology research. According to our research, a Chinese based company has plans to sell their flomoxef sodium in early 2017.

Due to immature technology, flomoxef sodium production capacity will not be released quickly in the recent years. However, once some company overcomes technology bottleneck and produces flomoxef sodium, the company can achieve preferable gains, that's why many investors are trying hard to enter into the industry currently.

The global Flomoxef Sodium market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
