Abstracts

This report studies the global Fluorosilicone Elastomer (FVMQ) market status and forecast, categorizes the global Fluorosilicone Elastomer (FVMQ) market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Fluorosilicone elastomer is a modified version of silicone rubber that has been fluorinated to 'cap off' the polymer chains to improve its chemical resistance.

Fluorosilicone rubber is widely used in aerospace applications where fuels, coolants and oils may be present. These same fluids would cause standard silicone rubber and most other products to deteriorate. Fluorosilicone products also have very good low temperature and high temperature properties and are inherently UV and ozone resistant.

The global Fluorosilicone Elastomer (FVMQ) market is valued at 170 million US\$ in 2017 and will reach 210 million US\$ by the end of 2025, growing at a CAGR of 3.1% during 2018-2025.
