According to QYResearch's new survey, global Food Authenticity Testing market is projected to reach US\$ 2531 million in 2029, increasing from US\$ 1533 million in 2022, with the CAGR of 7.5% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Food Authenticity Testing market research.

The food market includes both fresh and processed foods. According to our research, the global food and beverage market has a sales revenue of approximately US\$10 trillion. China is the world's number one food and beverage market and the world's number one food and beverage producer. In the market drivers section, the total consumer spending forecast shows that consumption at home is growing faster than consumption away from home. However, food service continues to become increasingly important due to changing lifestyles.
