Abstracts

Disinfectants used in food industry play a major role in health and hygiene. Industrial food production is governed by relatively strict legal regulations to protect consumers against poor hygiene and food poisoning, but also to protect manufacturers against claims for damages and shutdowns. Hygiene regulations are just one of a whole catalogue of aspects that manufacturers must comply with in the food and catering industry. Food And Beverages Disinfection can be achieved by means of chemical disinfectants in the environment without compromising the food safety and quality.

According to QYResearch's new survey, global Food Grade Disinfectant market is projected to reach US\$ 18310 million in 2029, increasing from US\$ 12360 million in 2022, with the CAGR of 5.8% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Food Grade Disinfectant market research.

The food market includes both fresh and processed foods. According to our research, the global food and beverage market has a sales revenue of approximately US\$10 trillion. China is the world's number one food and beverage market and the world's number one food and beverage producer. In the market drivers section, the total consumer spending forecast shows that consumption at home is growing faster than consumption away from home. However, food service continues to become increasingly important due to changing lifestyles. In addition, the rise of private label brands is putting pressure on the margins of brand manufacturers as retailers compete for a higher share of product sales.
