Abstracts

This report studies the global Fuel Cell Vehicles market status and forecast, categorizes the global Fuel Cell Vehicles market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

A fuel cell car (FCV) is a car powered by electric power generated by an on-board fuel cell device. The fuel used in an on-vehicle fuel cell apparatus is a highly-hydrogen-containing reformed gas obtained by reforming a high-purity hydrogen gas or a hydrogen-containing fuel. Compared with the usual electric vehicles, the difference in power is that the power used by the FCV comes from the vehicle-mounted fuel cell device, and the power used by the electric vehicle comes from the grid-charged battery. Therefore, the key to FCV is fuel cell.

Fuel cell technology for vehicle is becoming increasingly important owing to its uniqueness and non-pollution. The technology has the ability to power all vehicle types including heavy duty, power forklifts, passenger, and airport tugs. Environmental effects from vehicles emission is a key point to drive FCV market growth. Unlike traditional cars generated by non-renewable resource create a large amount of exhaust which can be harmful to health. New energy vehicle mainly depends to battery instead of petrol. North America was the leading global market owing to continuous government initiatives undertaken to develop hydrogen infrastructure in order to promote hydrogen fuel cell vehicle in this region. Additionally, Asia-Pacific is expected to witness the rapid growth over the forecast period owing to government support.

The global Fuel Cell Vehicles market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
