## Abstracts

This report studies the global Garbage Bag market status and forecast, categorizes the global Garbage Bag market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, Asia-Pacific, South America, and Middle East & Africa.

A bin bag (British English) or garbage bag, or trash bag (American English) is a disposable bag used to contain rubbish (British English), or the North American equivalent trash or garbage. Such bags are useful to line the insides of waste containers to prevent the insides of the receptacle from becoming coated in waste material. Most bags these days are made out of plastic, and are typically black in color. HDPE garbage bags are relatively inexpensive and can hold considerable weight compared to other material types. The segment is projected to expand 1.7x during the forecast period.

The global Garbage Bag market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
