Abstracts

This report studies the global Gas Cylinders market status and forecast, categorizes the global Gas Cylinders market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China, and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Transportation of high value gases remains to be a critical operation that fuels the utility of safe and regulated gas cylinders. Advancements in technologies for compressing volatile as well as inert gases in cylinders has influenced the manufacturing of gas cylinders. New cylinder designs and enhanced safety provisions have optimised the handling and storing abilities of gas cylinders. Robust materials are being used to build gas cylinders that can sustain the mechanical abrasion of dropping, tipping over and undue exposure to heat.

On the basis of size, it is observed that sales of gas cylinders weighing 14kgs and 5kgs will register highest demand by collectively accounting for nearly one-third share of global market value by the end of the forecast period.

The global Gas Cylinders market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
