This report studies the global Gas Sensors market status and forecast, categorizes the global Gas Sensors market size (value & volume) by manufacturers, type, application, and region.
This report focuses on the top manufacturers in United States, Europe, China, Japan, South Korea and Taiwan and other regions.
A gas sensor is a device that detects the presence of gases in an area, often as part of a safety system. This type of equipment is used to detect a gas leak or other emissions and can interface with a control system so a process can be automatically shut down. Gas sensors are adopted across various end uses such as industrial, petrochemical, and automotive industries. Moreover, process and manufacturing industries find extensive applications of various toxic and combustible gases, including hydrogen sulfide and nitrogen dioxide. Monitoring the concentration of these gases with the help of gas sensors helps in detecting and avoiding gas leaks.

The global Gas Sensors market is valued at 800 million US$ in 2017 and will reach 1380 million US$ by the end of 2025, growing at a CAGR of 7.1% during 2018-2025.
