A geogrid is geosynthetic material used to reinforce soils and similar materials. It is a two-dimensional grid or a certain degree of three-dimensional grid which is molded by the polypropylene, PVC and other thermoplastic polymer.

Geogrids industry concentration is not high. There are more than one hundreds manufacturers in the world, and high-end products mainly from Germany, America, Italy, Taiwan and China manufacturers. In China, the manufactures focus in Shandong province. Feicheng Lianyi and Shandong New Slightly Geotechnical Material are two big manufacturers. Also there are many small companies distributed in southeast, southwest and central regions of China.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Geogrids 3900 market in 2020.
